

# 12 Inverter connected to multiple 12V batteries

## Overview

---

Yes, you can use two batteries on a 12V inverter by connecting them in parallel. Ensure both batteries are of the same type and capacity for optimal performance and. For example, if you connect together two 12V 100Ah batteries the voltage remains at 12V but you now have 200Ah of battery capacity. This configuration allows you to increase the overall capacity (Ah) while maintaining the same voltage (12V). However, it is essential to follow specific guidelines to ensure safe and efficient operation.
