

33 Group Solar Power Generation

33 Group Solar Power Generation

6.5 GW of new solar was added in 2023, a 35% increase since 2022

The U.S. solar industry added 6.5 GW of new electric generating capacity in Q3 2023, a 35% year-over-year increase as federal clean energy policies begin to take hold. As a result of this ...

Solar PV Significantly Grew Globally in 2024, Bolstered by ...

In the past three months, the International Energy Agency, the International Renewable Energy Agency, and BloombergNEF published preliminary data for the power sector in 2024. These ...

[Global Market Outlook For Solar Power 2023](#)

The annual Global Market Outlook for Solar Power is a project that comes to life with the support and in-depth knowledge of the world's major regional and local solar industry associations. These ...

A global inventory of photovoltaic solar energy generating units

A global inventory of utility-scale solar photovoltaic generating units, produced by combining remote sensing imagery with machine learning, has identified 68,661 facilities -- an

Fraunhofer ISE, EVG develop 33.3% silicon-based multijunction solar ...

The Fraunhofer Institute for Solar Energy Systems ISE and its industry partner EV Group (EVG) have developed a new silicon-based multijunction solar cell with a conversion efficiency of ...

Global Solar Atlas

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and ...

Solar Industry Research Data - SEIA

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse ...

Solar PV power generation in the Net

Zero Scenario, 2010-2030

Solar PV power generation in the Net Zero Scenario, 2010-2030 - Chart and data by the International Energy Agency.

[Converts One-third of the Sunlight into Electricity: 33.3](#)

Researchers at the Fraunhofer Institute for Solar Energy Systems ISE together with the company EV Group have developed a new silicon-based multi-junction solar cell, which can convert exactly one ...

[Report: U.S. Adds 33 GW of New Solar Capacity in 2023](#)

A new report from the Solar Energy Industries Association (SEIA) and the Wood Mackenzie research group said the U.S. solar sector is expected to add a record 33 GW of new ...
