

# 5W solar panels in series

## Overview

---

To wire your solar panels in series, simply link the positive MC4 connector of the first solar panel to the negative MC4 connector of the next one, and continue this pattern for the remaining panels. Use our solar panel series and parallel calculator to easily find which common wiring configuration maximizes the power output of your solar panels. Find the technical specifications label on the back of your solar panel. Series Wiring - Increases total voltage while current stays the same; ideal for long cable runs and voltage-based inverter requirements. Solar inverters may have a minimum operating voltage, so wiring in series allows the system to reach that threshold.
