

Antananarivo energy storage cancellation

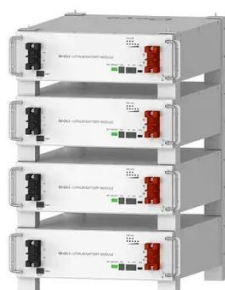

Overview

ANTANANARIVO - Madagascar's president on Friday sacked his energy minister in a bid to calm protests over power cuts and water shortages, which had left wreckage strewn across the capital a day earlier. In 2025, the Malagasy capital, Antananarivo, finds itself plunged into a profound energy crisis that is undermining the daily lives of its residents. Power outages, which have become almost daily, sometimes reach more than twelve hours per day. Police used rubber bullets and tear gas to disperse crowds of mostly young people in. The answer lies in locally manufactured energy storage systems. Consider these impacts on Antananarivo's economy: Wait, no - actually, recent data shows diesel costs have risen to \$0. This volatility makes energy storage not just preferable, but essential. This 60MW/240MWh facility combines lithium-ion storage with real-time grid management. Madagascar's capital, Antananarivo, where 3 million residents navigate streets as steep as San Francisco's - but with power outages threatening to stall both electric vehicles and vanilla exports.
