

# Are there subsidies for solar inverters

## Overview

---

Up to \$1,000 rebate (legislation pending to increase to \$5,000), 100% sales and property tax exemptions, battery tax credit worth 30% of cost (up to \$5,000), SRECs at \$57 per MWh (\$400+ annually for average system). If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your. The 30% federal solar tax credit, the single biggest financial incentive for homeowners installing solar, will officially end at the end of December. Any system installed after this year won't qualify for the discount that's helped millions of households cut thousands off their installation costs. The federal programs below may provide financial assistance to lower energy costs and may be applied to solar.
