

Belgian n-type solar module prices

Overview

Bifacial n-type modules saw prices rise from €0.096/W, over the same period. Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. As was common last year in the global solar sector, 2023 proved to be a record-breaking year for. Discover advanced N-Type solar panels with superior efficiency and low degradation for long-term performance. Photovoltaic modules with monocrystalline or bifacial HJT cells, N-type/TOPCon or xBC (Back Contact) and their combinations, with efficiencies above 22. Released by solar wholesaler sun. The high prices for M10 PERC and TOPCon cells is based mostly on those of Southeast Asian origins. Starting February 2025, the coverage of 210mm p-type cells will be discontinued.

Belgian n-type solar module prices

N-type Solar Panel Pricing Trend

N-type technology, while currently more expensive than standard P-type, is poised to follow a similar trajectory of rapid cost reduction. Increased competition and manufacturing expertise ...

[Photovoltaic Module Prices 2025: Updated Data](#)

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low ...

PV spot price

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar ...

PRICE INDEX , January 2026

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market.

N-type Solar PV Panel Market

A 2024 study of 25 utility-scale projects in Texas showed lenders applying 3-4% higher discount rates for N-type systems due to perceived technology risks, negating their long-term efficiency advantages.

[Panneaux Solaires : Prix et Subsidés \[Simulateur 2026\]](#)

Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live.

[pv dex: module price continues to decline in Europe](#)

The continued oversupply of solar modules and strong competition among suppliers have led prices to continue their downward trend initiated in May 2024, as shown in the chart above.

[Belgian n-type photovoltaic module prices](#)

Bifacial n-type modules saw prices rise from EUR0.09/W (US\$0.095/W) in January to EUR0.094/W in February, while full black modules saw a price increase of 7%, from EUR0.09/W to EUR0.096/W, over the same period.
