

Budapest lithium-ion battery technology

Overview

As Jason Chen, Head of CATL Europe, announced at a Hungarian trade conference, the company began assembling battery modules in a rented commercial property in Debrecen back in September. This means that the world's largest manufacturer of lithium-ion batteries has started. Then, two years ago, Chinese electric vehicle battery giant CATL started building a massive factory about a kilometre from her polytunnels – the result of Prime Minister Viktor Orbán's push to make Hungary the EV battery hub of Europe by courting investment from major producers, mainly Chinese and. The Chinese battery manufacturer has started production in Debrecen. This means that the. From time to time, we would like to contact you with news and information about our services and relevant industry news. Sign me up to receive updates from SK tes! For more information on how to unsubscribe, our privacy practices, and how SK tes is committed to protecting and respecting your. The company focuses on the NexSys® iON lithium battery series. These batteries are mainly used in high-demand applications such as material handling equipment, AGVs, and ground support vehicles, with an emphasis on high voltage, fast charging, and long-term stable operation.
