BESS

Overview

Solar panels cannot be simply switched off when exposed to light, as this can potentially cause electrocution. The only reliable means of rendering the panels safe is to use the 'liquid blanket' PVStop. Otherwise you need to disconnect the cables, but be careful not to short circuit your panels. Is there an emergency shut-off?

Can you. Therefore, “turning off” a panel means physically blocking the light or interrupting the electrical circuit downstream, not stopping the initial physical process. Depending on your system, there might be more than.
