

Can solar panels with broken glass still be used

Overview

A solar system with a broken glass panel often continues to work. However, even though broken solar panels may still generate electricity, their efficiency is significantly compromised. Damaged solar panel glass can lead to reduced sunlight absorption, causing a decrease in overall energy. While your damaged solar panel isn't completely useless, it's like trying to see through a shattered smartphone screen – things just don't work as well. Visions of lost energy, safety hazards, and expensive replacements might immediately come to mind.
