

# Can the apartment building be equipped with solar power generation

## Overview

---

Most multi-family buildings can be powered with 100% solar energy, however the number of solar panels needed will vary depending on your property's square footage. Generally, a small or average-sized apartment building will require 500-1000 watts of solar PV capacity to meet its. Today's innovative solar solutions - from portable balcony panels to community solar programs - make clean energy accessible to renters and apartment dwellers alike. Here are the major factors to consider: Ownership vs. renting: Having a flat under your own name allows one to take charge of any remodeling acts. Going solar for renters is indeed an option. When you combine a sufficient number of panels with an inverter, mounting structure, wiring, and sometimes batteries, you get a rooftop solar system.
