

# Candle light can be used as photovoltaic panels

## Overview

---

They produce a sustainable and environmentally responsible source of illumination by combining solar cells, rechargeable batteries, and LED (Light Emitting Diode) technology. Solar candles use photovoltaic cells that absorb sunlight and transform it into power. In such cases, you wish there was a better alternative. Two buttons on the back. Creating a DIY solar flameless candle is quite straightforward if you have some basic know-how of circuits and soldering. During the day, the solar panel converts. Price and other details may vary based on product size and color. Carbon emissions from the lifecycle of this product were measured, reduced and offset.
