

Cleaning dirt from solar inverters

Overview

This guide provides practical tips on what to do and what to avoid when cleaning your inverter. Use soft dry cloth/microfiber or soft brush to remove dust (vents/fans included). Vacuum gently with a soft-brush. Cleaning your inverter is essential for maintaining its efficiency and longevity. This can be achieved by turning off the power switch of the inverter and disconnecting the circuits connected to the solar panels. Once installed, they quietly convert sunlight into electricity day after day. Dust, pollen, leaves, bird.
