

Cyprus New Energy Storage System

Overview

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy infrastructure and aligning with its national goals for renewable energy integration and grid optimization. On January 26, 2026, the Frederick Research Center, one of the leading research institutions in Cyprus specialising in areas such as materials science and sustainable engineering, and RTD Talos, a key research and development and innovation player in Cyprus, presented an innovative thermal energy storage system. Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday, addressing the country's growing need to manage excess green energy production. The planned battery storage facility approved in Alampra, Nicosia district, has sparked outrage among residents and lawmakers who warn the project could turn their neighborhood into a safety and quality-of-life nightmare.

Cyprus New Energy Storage System

[Cyprus approves 120MW battery storage system](#)

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for the island's ...

Cyprus to deploy renewable energy storage systems starting in 2026

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions on Tuesday, ...

Frederick Research Center, RTD Talos present unique energy storage system

On January 26, 2026, the Frederick Research Center, one of the leading research institutions in Cyprus specialising in areas such as materials science and sustainable engineering, ...

[Cyprus to Launch Renewable Energy Storage Systems by 2026](#)

Cyprus is poised to introduce large-scale renewable energy storage solutions by 2026, a move aimed at addressing the nation's increasing demand for effective energy management.

[Cyprus Approves Big Battery Energy Storage System Project](#)

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is ...

[Cyprus switches on first significant battery system](#)

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by the University of ...

A 120 MW capacity energy storage system is to operate by June 2026

By June 2026 at the latest, the distributed energy storage system with a total capacity of 120 MW, which is currently being implemented, will be operational and will function with full ...

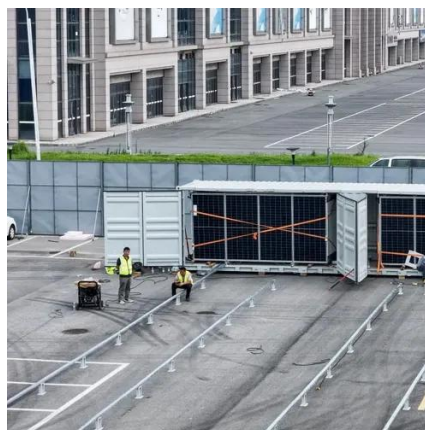

Cyprus Charges Ahead with Large-

Scale Battery System: A New Era ...

In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months.

[Cyprus Launches First Major Battery Energy Storage System](#)

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy infrastructure and ...

Residents alarmed as 40 MW battery station approved near homes in

They stressed that energy storage initiatives must be balanced with respect for human life, safety, and the environment. Low demand and lack of storage forcing Cyprus to cut solar power output Cyprus ...
