

Does the solar power generation community allow installation

Overview

Community solar allows multiple customers, or “subscribers,” to purchase the output from a single solar photovoltaic array. In most cases, customers benefit from energy generated by solar. It introduces community solar programs and their benefits, explains different ownership models, and ends with the best practices to keep in mind when starting a locally-owned community solar project. The. That's where community solar comes in. It. Often referred to as “community solar gardens” or “community solar farms”, these projects are renewable energy plants whose electricity is shared by more than one household, and provide the opportunity for you to go green in the garden, even if your thumb is not.
