

East Timor generators arrive at power station

Overview

On August 19, the Secretary of State for Electricity, Water and Urbanization, Januário Pereira, was present at the Díli Port to welcome the recently arrived seven new generators, soon to be placed in the power plant. The generators have an Italian engine and Finnish alternators. Hera Diesel Power Plant is a 119 MW oil-fired generating station on the coast at Hera, about 15 km east of Dili in Timor-Leste. “These generators. While the small Southeast Asian nation — and one of the world's youngest countries — has made international and domestic pledges to reduce its carbon footprint through untapped solar and other renewable energy potential, it faces a looming economic crisis as the gas fields its economy depends on. On August 24, the Prime Minister Kay Rala Xanana Gusmão received seven Wartsila brand generators, from the Puri Akraya Engineering Company. Timor-Leste consumes 125 GWh of electricity per annum, an average of 95 kWh per person.

East Timor generators arrive at power station
