

# Electric vehicle infrastructure switzerland

## Overview

---

The roadmap's three main goals are to increase the share of electric vehicles to 50% of new registrations, expand the public charging network to 20,000 stations, and ensure user-friendly and grid-compatible charging by the end of 2025. In 2024, there was a change in electric vehicle sales with figures not increasing for the first time since their introduction. In order to document this development, the Swiss Federal Office of Energy regularly evaluates the real-time data from. On September 3, 2024, Federal Councillor Albert Rösti announced that Switzerland's successful Electromobility Roadmap, first launched in 2018, will be extended to 2030. During the 13th platform event for the Electromobility Roadmap 2025, held in Bern, he outlined plans to broaden the scope of the. Switzerland is leading the charge in Central Europe when it comes to electric vehicle (EV) adoption, offering a dynamic and evolving ecosystem for EV enthusiasts, industry professionals, and infrastructure planners. From premium networks and charging infrastructure density to the latest trends and. Carrot, stick. OR NEITHER?

– Making EVs more attractive consumers with bonuses – >9/10 of new cars are electric! We do not believe it's our job to make the best app, but we want to enable the market to do so., vehicle-to-grid, vehicle-to-home.

## Electric vehicle infrastructure switzerland

### Switzerland - EV TCP

While electric mobility has been largely exempt from road taxes at various levels, the growing share of electric vehicles is leading to significant shortfalls in road financing soon. For heavy trucks, the ...
