

Energy storage backup power supply in the democratic republic of congo

Overview

As the Democratic Republic of Congo (DRC) seeks to overcome chronic energy shortages, energy storage systems are emerging as game-changers. This article explores how manufacturers like EK SOLAR are addressing the country's unique challenges through innovative battery technologies. Local installations are becoming more prevalent. EESS provide storage of electrical energy so that it can be used later. The approach is not new: EESS in the form of battery-backed uninterruptible power supplies (UPS) have been used for many years. The country grapples with a myriad of infrastructural deficiencies, which results in a considerable portion of the population lacking access to. This work is a product of the staff of The World Bank with external contributions. By reducing the need for peaking power plants, which encourages sustainable practices. What does Kamoanga's 30 MW solar+storage project mean for Africa?
