

# Energy storage power station high voltage direct hanging

## Overview

---

The direct-mounted energy storage can output 35 kV voltage without going through the transformer, which can not only reduce energy loss, but also reduce energy consumption. It can quickly respond to grid demand and achieve a millisecond-level response speed. The product adopts advanced cascade topology structure, which is composed of incoming reactor, cascade power unit, lithium battery module and precise control and protection equipment, realizing the optimal utilization and storage of energy. Here's where things get interesting. and Zhejiang Shuangcheng Electric Co. The connection would lead to the problems of low efficiency. Huijue Group's energy storage solutions (30 kWh to 30 MWh) cover cost management, backup power, and microgrids.
