ENERGY STORAGE SYSTEM

Overview

For Commercial and industrial (C&I) businesses, a battery energy storage system (BESS) can help optimize energy costs, improve energy resilience, decarbonize their operations and accelerate electrification. POWERSYNC™ designs and builds advanced energy storage which is deployed in demand response enabled microgrid solutions for commercial and industrial (C&I) applications. Our advanced solutions allow companies to mitigate economic risk with on-site independent backup power to essential equipment. Our C&I energy storage solutions implement peak-valley time shifting and utilize power during off-peak times to reduce electricity costs and balance peak load. Our modular LFP battery packs are scalable, catering to storage requirements ranging from kWh to MWh. With the growing emphasis on sustainability, energy.
