

Energy storage system high voltage DC relay

Overview

AQ-A SSR (PhotoMOS), HE-V relay, and 10A and 20A types of EP relays are used for preventing an inrush current into capacitors when charging. Battery management systems (BMSs) monitor temperature and voltage in battery pack cells to guarantee safety and reliability. This allows them to disconnect themselves from the. High-voltage DC relays and contactors are essential components for safely controlling and isolating electrical circuits in modern energy and mobility systems. Our contactor relays come with continuous current ratings up to 500 A and maximum voltage ratings up to 1.
