

# Eps power cabinet configuration and battery cabinet size

## Overview

---

Minimum cabinet height = Rack height (to top of rail) + Battery height + Space above battery (12" ideal) + Charger height + 6" (for space above charger)

Chargers need room to breathe and batteries need extra room above for maintenance (watering and testing). This is all necessary information for determining the minimum length, width and height of the enclosure. There may be multiple ways to configure the cabinet, so consider all possible options. For instance, if a battery, rack and charger are required the system can be designed using a 2 step rack. A BESS cabinet (Battery Energy Storage System cabinet) is no longer just a "battery box.
