

Equip an solar container outdoor power

Overview

PV containers give clean and steady solar power off-grid. They are great for faraway work sites, outdoor events, and moving businesses. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels. Why power a shipping container?

There are many reasons to supply electricity to a container, especially in off-grid settings. A solar power container is a self-contained, portable energy generation system housed within a standardized shipping container or custom enclosure. It works even in far away outdoor places. Between my electric bikes, e-motorcycles.
