

Florida microgrids denmark

Overview

Danish fund manager Copenhagen Infrastructure Partners (CIP) and pension fund PensionDanmark have launched Plexar Energy, a new company that will develop, install and operate microgrids to tap into the growing commercial potential of this segment. Plexar Energy will focus on the industrialization of microgrids, co-located production and consumption in battery-balanced energy systems. The initiative is backed by the €112.5 million CI Microgrid Electrification Fund. Bornholm Island acts as a microgrid lab to further Denmark's ambitious target to produce 100 percent of its electricity from renewable sources by 2050. According to an announcement today, the new. How does 6Wresearch market report help businesses in making strategic decisions?
