

Georgia load shifting

Application scenarios of energy storage battery products

Overview

January 23, 2025 - (ATLANTA) The Georgia Public Service Commission voted unanimously on Thursday to approve a new rule that allows Georgia Power to charge new data centers in a manner that will protect ratepayers from cost shifting. The new rule approved Thursday derives from the Public Service. Georgia Power has filed nearly 2 gigawatts of new customer contracts with the Georgia Public Service Commission (PSC), marking a major milestone for the state's energy landscape. These agreements are the first to be reached under the Georgia PSC's newly approved rules and regulations, which are. In late 2023 and early 2024, the murmur among data center operators was that the industry would need to start taking steps to improve its energy usage efficiency, not just because it was a financially and ecologically responsible thing to do, but if the industry didn't start taking that. ATLANTA - Georgia energy regulators voted Thursday to put some guardrails around the proliferation of power-hungry data centers cropping up across the state.
