

# Guyana Hospital Uses 100kW Outdoor Photovoltaic Unit

## Overview

---

They were often sent to Skeldon Hospital — a 50-mile journey by boat! ☐☐ But things have changed thanks to solar energy!☐☐ Through the ISA Cares Initiative, the centre was solar-powered in 2023. A new solar unit with battery storage was installed, providing 24/7 electricity. Site assessments, solar energy designs and training for healthcare personnel for determining energy needs and infrastructural condition of Primary Health Care facilities in Guyana to create plans for Request for proposal Background UNICEF Guyana Country Office is committed to scaling up. The general objective of the program is to support the diversification of Guyana's energymatrix towards the use of climate-resilient renewable energy sources in the electricity generation matrix. The specific objectives of the program are to: (i) avoid CO2 emissions with the development of solar. ☐☐ Bringing Solar Power to a Healthcare Centre in Guyana! We've been to Orealla, a remote Indigenous village in Guyana, where accessing basic healthcare was once a daunting challenge. Home to 1,600 people, Orealla's healthcare centre struggled without electricity after sunset. The centre relied on. Diversifying GPL's energy source with solar farms Guyana Power and Light Inc. (GPL) is implementing the Guyana Utility-Scale Solar Photovoltaic Program (GUY SOL) as part of its commitment to a sustainable energy future. 02 MW on the rooftops of 175 public or government buildings.

## Guyana Hospital Uses 100kW Outdoor Photovoltaic Unit

### [Guyana Utility Scale Solar Photovoltaic Program \(Guysol\)](#)

The general objective of the program is to support the diversification of Guyana's energymatrix towards the use of climate-resilient renewable energy sources in the electricity ...
