Q — Can I charge my lithium battery during winter storage?

It's safe to charge lithium batteries when done correctly. Exposure to freezing temperatures can temporarily reduce battery output, and in severe cases, cause irreversible damage. LiFePO4 lithium batteries, like the Delong Top Energy 5.12kWh available from Wattuneeed, offer excellent resistance to cold, but require special precautions: "The Rousseau family, owners of a solar installation. Storing lithium batteries for the winter isn't as simple as just putting them away in a drawer. These power sources have unique chemical properties that react to temperature changes and storage conditions, which can affect their capacity and lifespan.
