

# Honduras Wind Solar and Energy Storage Project

## Overview

---

The project, a national key initiative of Honduras, will significantly enhance the stability of Honduras' power grid and its capacity to integrate renewable energy upon completion, contributing to the optimization of local energy structures and the sustainable development. The project, a national key initiative of Honduras, will significantly enhance the stability of Honduras' power grid and its capacity to integrate renewable energy upon completion, contributing to the optimization of local energy structures and the sustainable development. The National Electric Power Company (ENEE) has selected a Chinese-Honduran consortium to design, supply, install, test, and commission a grid-connected battery energy storage system (BESS) at the Amaratéca substation in the department of Francisco Morazán. Honduran state-owned utility ENEE has. Last week (7 November) saw bids opened for a 75MW/300MWh BESS tender launched by the government of Honduras, in Central America. The public event marked the opening of bids for the energy storage procurement, called LPI-001-ENEE-UEPER-2024, for the 'Supply, installation, testing and commissioning. Recently, Windey, in collaboration with EQUINSA, a local Honduran power company, successfully won the EPC turnkey contract for Honduras' first energy storage project—the Honduras Energy Storage Project—marking a critical breakthrough of "first bid, first win" in its international energy storage. Honduras has awarded a US\$50. 2 million contract for a 75 MW battery energy storage system to the Chinese-Honduran consortium Windey-Equinsa. This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by. According to the report by the media outlet El Mundo, the Honduran Minister of Energy, Erick Tejada, mentioned that the contract for the construction of a 75 MWh battery energy storage system, valued at \$50. This analysis ranks major projects and explores their impact on Central America's power grid stability.
