

Honiara has chinese solar-powered communication cabinet inverters

Overview

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids. Energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters. The piece provides real-world attack scenarios from a business owner's perspective, analyzes the broader U.S. power infrastructure, and discusses how power inverters can be found in solar panels and wind turbines that are connected to the electricity grid as well as batteries, heat pumps, and electric vehicle chargers.
