

How long does the warranty for photovoltaic panels last

Overview

Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often guarantees at least 90% production at 10 years and 80% at 25 years. A standard solar panel warranty should come with at least 10 years of protection, though many premium options now offer 25 or even 30+ years of coverage. But lifespan isn't just about whether a panel still functions; it's about whether it's still delivering the return. Solar panels are designed to last for decades, often 25 years or more. But like any product exposed to the elements, things can go wrong. Whether it's a manufacturing defect, a sudden performance drop, or wear and tear over time, you want to be protected.
