

How much does a solar power counterweight cost

Overview

Expect the cost per watt to be between \$2 and \$3 per watt. The key thing, according to Flores: “If you're closer to \$2 per watt, it's almost always going to make sense financially. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Get solar power system costs based on your location, roof, power usage, and current local offers. Published: February 2026 Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Historic Low Pricing: Solar costs have reached unprecedented lows in 2025, with systems ranging from \$2.50 per watt installed, making the technology more accessible than ever before.
