

# How much is 5 megawatts of battery energy storage

## Overview

---

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$420,000, varying by location, system size, and market conditions. This translates to around \$150 - \$420 per kWh, though in some markets, prices have dropped as low as \$120 - \$140 per kWh. Key. Capex of \$125/kWh means a levelised cost of storage of \$65/MWh 3. With a \$65/MWh LCOS, shifting half of daily solar generation overnight adds just \$33/MWh to the cost of solar This report provides the latest, real-world evidence on the cost of large, long-duration utility-scale Battery Energy.
