

How much is the export tax rebate for photovoltaic panels

Overview

The government slashed the export tax rebate for solar products from 13% down to 9%. That's a 4-percentage-point drop that hit manufacturers right in their margins. From 1 January. China reduced its solar export tax rebate from 13% to 9% in December 2024, with industry sources indicating further cuts to 3-5% or complete elimination by January 2026. This impacts custom solar panel buyers differently than commodity purchasers—smaller manufacturers face tighter margins, over 50. China will scrap value-added tax export rebates for PV products from April 1, 2026, while cutting battery rebates ahead of a full phaseout, raising export costs for manufacturers and potentially pulling shipments forward into early 2026.
