

Indoor uninterruptible power supply

Overview

Explore top-rated uninterruptible power supplies for home, including CyberPower and Tripp Lite models. Features 700VA to 1500VA systems with battery backup, surge protection, and USB charging ports. Compact designs for reliable home power protection. An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating. But if you want to keep your home Wi-Fi network and some other key electronics up and running in the event of an outage, an uninterruptible power supply, or UPS, is worth the investment. The CyberPower LE1000DG is the best UPS for people who want to back up a few small electronics — such as a. Amazon. : Electronics New customer?

Start here. We offer UPS solutions for DC and AC applications where the functionality and design are optimally tailored to the requirements of various different industries.
