

Irish solar outdoor power cabinet export tariff

Overview

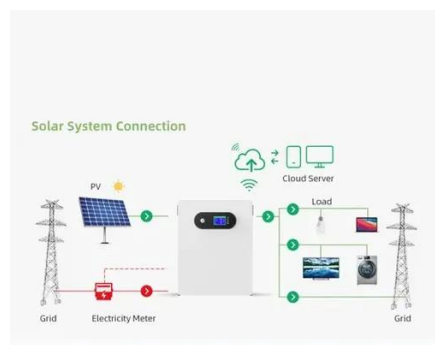

We're excited to announce that from 1st September 2025, new customers who have their solar PV system installed with Activ8 and sign up with SSE Airtricity will benefit from Ireland's best export rate of 32c per kWh for excess solar energy exported back to the grid. Solar energy export allows Irish businesses to sell excess electricity generated by their solar PV panels back to the national grid. What Is Solar Energy Export?

Solar energy export is the process of sending unused electricity. If you are considering applying for a tariff under the Small-Scale Renewable Support Scheme (SRESS) as a project exporting all electricity that you generate to the grid, we recommend following these initial steps: First, look at your site or building to see if it could work for a renewable energy. This guide will walk you through what net metering is (and isn't), how Ireland's export tariff system works, and what homeowners in Dublin, Cork, and beyond should know before deciding to install solar. What Is Net Metering?

Net metering is a billing system used in some countries where solar panel. Your solar export payment depends on: Below you can see payment per unit, depending on supplier: From 1st of January 2023. Reported by RTÉ Energy Hero league table of solar feed in tariffs Ireland 2024 Electricity export amounts vary massively. You can earn money from this. Energia currently offers a competitive rate of 18.
