

Is it okay to install photovoltaic panels on an arched roof

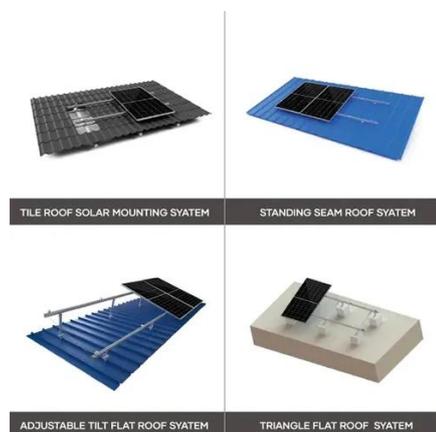

Overview

Pitch and Shape: While solar panels can be installed on roofs with different pitches and shapes, steeper roofs tend to have higher energy production due to increased exposure to sunlight. It's important to consider the pros and cons of solar panels on your roof before you decide if a solar panel installation is right for you. Solar panels offer a compelling mix of environmental benefits and financial incentives.

Professional Installation is Critical for Safety and Warranties: Solar panel mounting involves working at dangerous heights with structural modifications that can void warranties if done incorrectly. However, the installation process and equipment requirements may vary based on the roofing material.

Is it okay to install photovoltaic panels on an arched roof
