

Long-term discount for pv distributionized equipment used in schools

Overview

The new Direct Pay option for nonprofits allows schools to receive a payment from the federal government for 30% or more of the solar installation cost. This significantly reduces the installation cost, making solar ownership more attractive for schools. In January 2025, Jefferson County Public Schools (JCPS) in Kentucky received \$1. These systems will improve indoor air quality, cool down classrooms, and cut energy costs - freeing up funds for teacher salaries and. Many if not most independent schools have the physical space for substantial installations of solar power: large, flat roofs; spacious parking lots and/or adjacent, unused land. Reduces school operating costs, creating resources for teachers and students. Supports thousands of clean energy. The Solar for Schools Grant Program ("Program") is established pursuant to the act of July 17, 2024 (P. Beyond. While many schools rely on third-party funds to support solar projects, there are additional opportunities to scale renewable energy adoption through federal programs, state legislation, and local partnerships.
