

Madrid renewable energy growth

Overview

With strong policy support, academic leadership, growing investor interest, and a sharp rise in renewable and digital infrastructure projects, the Community of Madrid is positioning itself not only as a national leader, but as a regional force in the clean energy . With strong policy support, academic leadership, growing investor interest, and a sharp rise in renewable and digital infrastructure projects, the Community of Madrid is positioning itself not only as a national leader, but as a regional force in the clean energy . With strong policy support, academic leadership, growing investor interest, and a sharp rise in renewable and digital infrastructure projects, the Community of Madrid is positioning itself not only as a national leader, but as a regional force in the clean energy transition. The shift is no longer. 56. 8% of all electricity generated in Spain over the last year came from natural sources such as wind, sun, or water. The Spanish electricity system added 7. 3 GW of new photovoltaic and wind power capacity, the highest increase ever recorded in a single year. This makes photovoltaic energy the. With genuine ambitions regarding the energy mix, the region aims to significantly reduce its carbon footprint by decreasing greenhouse gas emissions and continuing to develop an ecosystem conducive to clean energies. Benefiting from abundant sunshine, favorable for photovoltaic solar energy. In the Renewable Energies industry the region has important offices and headquarters of leading companies that develop business, engineering and R&D on solar and wind projects, such as Acciona, Iberdrola, Repsol, Endesa, Enagas, Moeve, Naturgy, Siemens Gamesa, Sener, Empresarios Agrupados or. In 2025, renewable energy production will exceed 149 TWh, its historical maximum, which would represent 56% of the mix.

Madrid renewable energy growth

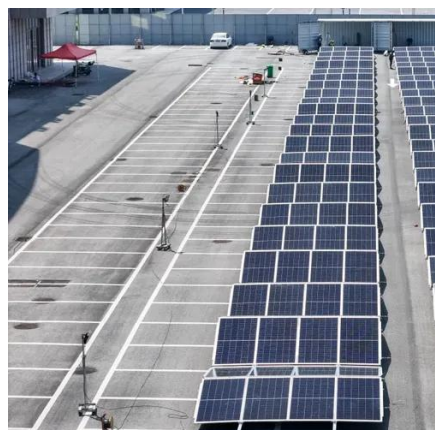

[Total electricity generation , System reports](#)

Madrid is the autonomous community where renewable energy generation experienced the highest growth in 2024. Following a 24.6% increase compared to the previous year, it accounted for 46.3% of ...

[Madrid's CleanTech & Green Innovation Surge: Leading the ...](#)

With strong policy support, academic leadership, growing investor interest, and a sharp rise in renewable and digital infrastructure projects, the Community of Madrid is positioning itself not ...

[25 Top Renewable Energy Companies in Madrid · January 2026](#)
