

Myanmar building solar power generation home

Overview

The project involves the construction and operation of twelve solar facilities spread across central and southern Myanmar. This large-scale rollout is designed to bolster the country's energy security and support its long-term economic growth, which sees an annual electricity. THE Shwe Myoh Solar Power Plant, located in Zeyathiri Township, Nay Pyi Taw Council Area, is expected to begin generating electricity in June 2026. Currently, work on the solar tracker systems, including the base and tracker poles, has been completed. Of the total 60,000 solar panels planned for. Myanmar is poised to make a significant leap in its renewable energy capacity, with 12 utility-scale solar power plants scheduled to connect to the national grid in 2026. The project is being developed by Green Earth Power (GEP), Thailand, and WELink Energy, UK, and powered by American power company Enel Green Energy and the Government of Myanmar's Ministry of Electricity and Energy (MOEE). Among these, four projects are being built in the Union Territory of Nay Pyi Taw. Myanmar is currently implementing 11 hybrid and solar power generation projects, according to Admiral Tin Aung San, Chairman of the Electric Power and Energy Development Commission.
