

National-level solar panels

Overview

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes corresponding PV facility information, including panel type, site type, and initial year. Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48. Here are some quick statistics about solar energy in the United States: Note: Data from U.

National-level solar panels

[Unlocking America's rooftop solar potential](#)

Scrolling further down reveals the state dashboard, where users can select individual states to view data on small-scale solar energy production, the equivalent number of average American homes ...

U.S. Utility-Scale Solar, 2025 Data Update , Energy Markets & Planning

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

Solar State By State - SEIA

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of solar installed, ...

[The U.S. Large-Scale Solar Photovoltaic Database](#)

The database combines datasets from the U.S. EIA, the Environmental Protection Agency (EPA) and the National Renewable Energy Laboratory (NREL). The locations and array boundaries of all facilities were ...

[Solar Photovoltaic System Cost Benchmarks](#)

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Read more to find out how these cost benchmarks are modeled and ...

[Utility-Scale PV , Electricity , 2024 , ATB , NLR](#)

2024 ATB data for utility-scale solar photovoltaics (PV) are shown above, with a base year of 2022. The Base Year estimates rely on modeled capital expenditures (CAPEX) and operation and maintenance (O& M) cost ...

Solar, battery storage to lead new U.S. generating capacity additions

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount ...

[Solar Installed System Cost Analysis](#)

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost ...

U.S. Distributed Solar and Storage Data , Energy Markets & Planning

U.S. Distributed Solar and Storage Data Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a ...

[2025 Solar Energy Statistics: Latest Industry Survey Data](#)

In early 2025, SolarReviews concluded our third annual survey of companies in the U.S. solar industry. We heard from hundreds of companies that comprise various industry sectors, from residential solar installers to ...
