

New community solar power generation

Overview

Community solar projects generate renewable energy on behalf of multiple customers, who receive credits on their monthly electric bills for their share of the clean electricity that's produced. In most cases, customers benefit from energy generated by solar. Community distributed generation (CDG) is making a difference in our clean energy future and creating an exciting new chapter of renewable energy in New York. NLR conducts market analysis, provides technical assistance, and develops tools and resources for community solar.

New community solar power generation

[Why Community Solar Is Key to the Clean Energy ...](#)

Over a third of Americans rent, and over half of homeowners can't use their rooftops for solar. Community solar power can help fill this gap.
