

Octopus solar panel storage

Overview

When you opt for solar panels with Octopus they currently give you the choice of two battery storage options: 5kWh battery storage – For small to medium sized homes. This is best for solar systems with 6-10 PV panels. Here's an overview. By integrating battery storage with renewable energy sources like solar power, households can make the most of their own clean energy generation, reduce their reliance on the grid and potentially lower their energy bills. As of Could 2024, the price of a panel-only set up by Octopus begins from £3,880] (for 4 panels), whereas a ten panel set up and a 5kWh. All of our solar packages are installed with state-of-the-art 450W PV solar panels, and come with a whopping 25 year product warranty, and a 30 year linear power output warranty – guaranteeing your system's performance over time.
