

Off-grid cost of australian solar cabinet-based systems

Overview

If you're set on an off-grid power system, expect to pay somewhere between \$25,000 - \$45,000 for an average Aussie home. Larger systems that can generate more electricity will generally be more expensive due to the increased number of solar panels and storage capacity required. But while the freedom of energy independence sounds appealing, understanding the true costs and savings is key before making the switch. If you have a grid connection, you are far better buying a solar panel system. A modest setup powering essentials like a fridge.
