

Outdoor power supply is bright

Overview

Use solar units, a 12-volt low-voltage kit with a transformer, or outdoor-rated mains fixtures with RCD protection matched to your layout. Done right, outdoor lighting looks good, works reliably through the seasons, and doesn't drive up bills. A properly sized transformer converts your home's 120V AC into safe 12V or 15V low-voltage power, keeping your lights bright and consistent. Low voltage usually runs on 12 volts, which is safer and easier to install. Learn more [DEWENWILS 60W Low Voltage Transformer, 120V AC to 12V DC, Dusk to Dawn Sensor & Timer, Weatherproof Low Voltage](#). The APS power strip offers two different types of outlets, ample capacity, and excellent weather resistance, which is why it's the best all-around option when it comes to expanding the capacity of your outdoor power outlet. Thanks to drainage holes that direct water that enters through its sockets. Start by checking if your outdoor lighting has power. Find all your outdoor yard lights and look for damage or loose wires.
