

Outdoor site of ordinary power base station

Overview

Equipped with intelligent system management and a long-life backup battery for up to 3500 cycles, this station is designed to meet extreme outdoor conditions at IP55 protection, temperature-controlled air systems, and resistance to salt spray up to 500 hours. For construction applications, where machine and site positioning operations using GNSS will be carried out over a long time (weeks, months, or years), ensure that you carefully choose the base station location. A semi-permanent or permanent base station helps to eliminate the types of error that. The Large-scale Outdoor Communication Base Station is a state-of-the-art, container-type energy solution for communication base stations, smart cities, transportation networks, and other crucial edge sites. From modern outdoor office spaces to curated hospitality rooftop retreats, people expect to be charged up and connected to their devices indoors and out. However, store-bought models can cost \$500 to \$3,000+ and more.
