

Photovoltaic FRP grating accessories

Overview

There are two kinds of necessary accessories of FRP grating: legs and clips. Molded grating can be economically supported by perpendicular grating legs made of FRP where ordinary support beams are difficult to install or no ordinary support beams can be installed due to the low. The following accessories are readily available to assist in the professional installation of our grating products: Pultruded fiberglass reinforced plastic (FRP) curb angle protects the lead edge of concrete trenches and pits and provides a uniform bearing surface for the grating. We offer a fully customizable line of fiberglass grating riser pads that give the grating panels a slight. When you install your fiberglass grating from Marco Specialty Steel, you need to choose the right accessories. At Fibergrating, we understand the significance of these components and offer a comprehensive range of high-quality. Crafted from high-strength fiber glass grating, this solar moded FRP grating walkway offers a one-piece, molded construction that dramatically improves load-bearing performance, even in demanding rooftop environments. These gratings are lightweight, anti-slip, UV-resistant, and non-conductive, ensuring long-lasting.
