

# Photovoltaic and wind power generation market share

## Overview

---

**Solar Dominance with Wind Following:** Solar energy commands 42% of the renewable market (\$420-500 billion), while wind power holds 25-30% (\$350-420 billion), together accounting for approximately 70% of all renewable energy investments and capacity additions. The global renewable energy market size was estimated at USD 1,602 billion in 2025 and is projected to reach USD 4,860. 85 billion by 2033, growing at a CAGR of 14. The global shift toward low-carbon energy alternatives and increasingly stringent environmental regulations across. The year 2024 was a true landmark year for solar power. 5 trillion in 2025, representing a 12-15% CAGR over the past five years and establishing renewables as a dominant force comparable to entire national economies.

## Photovoltaic and wind power generation market share

### [Renewable Energy Market Size 2025: Global Analysis, Growth](#)

Solar Dominance with Wind Following: Solar energy commands 42% of the renewable market (\$420-500 billion), while wind power holds 25-30% (\$350-420 billion), together accounting for ...

### [Renewable electricity - Renewables 2025 - Analysis](#)

For solar PV, wind and bioenergy for power, deployment has been revised downwards. Solar PV accounts for over 70% of the absolute reduction, mainly from utility-scale projects, while offshore ...

### **Solar Photovoltaic (PV) Market , Global Market Analysis Report**

Within the renewable energy market, solar PV holds about 40%, making it the largest single contributor ahead of wind, hydro, and biomass. In the power generation market, its share is ...

### [Solar Photovoltaic Market Size, 2025-2034 Trends Report](#)

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of solar PV across agriculture and business ...

### [Renewable Energy Market Size, Share, Industry Report, 2033](#)

Solar experienced the fastest growth among all power generation technologies in terms of electricity output, three times as much as wind power, which was ranked second.

### [Power Generation Market Size, Share, Industry Trends \[2032\]](#)

Power generation refers to the production of electrical power from different energy sources such as sunlight, wind, water, fossil fuels, and other sources at the power plants.

### [Renewable Energy Market Size, Share, Industry Report, 2033](#)

Asia Pacific dominated the global renewable energy market with the largest revenue share of 41.51% in 2025. The renewable energy industry in the U.S. continuously expand rapidly over the forecast ...

## **Solar PV and Wind Energy Market -**

## Size, Share, Trends, Analysis

Asia Pacific and Europe are leading regions in terms of market share, driven by their ambitious renewable energy targets, supportive policy frameworks, and favorable market conditions for solar ...

## [Photovoltaics Market Size, Share, Trends and Growth](#)

In the photovoltaics market, factors such as growth in the adoption of PV systems for residential applications, decreasing costs of PV systems, and advancements in energy storage devices are ...

## [Power Generation Market Size, Share, Industry Trends ...](#)

Power generation refers to the production of electrical power from ...

## [Global Market Outlook for Solar Power 2025-2029](#)

Solar experienced the fastest growth among all power generation technologies in terms of electricity output, three times as much as wind power, which was ranked second.

## [Renewable Energy Market Size & Share](#)

## Analysis

By end-user, Utilities held 66.85% share of the renewable energy market size in 2025, whereas the Commercial and Industrial segment is growing at 16.73% CAGR through 2031.
