

Photovoltaic panel export policy

Overview

Exporting solar panels in 2025 requires navigating a regulatory obstacle course: Brazil's recent 12% import tariff hike serves as warning - developing nations are increasingly using trade barriers as climate policy tools. Smart exporters now maintain: Let's crunch real. Solar photovoltaic (PV) manufacturing involves making a wide variety of products and materials across several manufacturing steps, often done in different locations. In the United States, there are two leading types of solar panels: cadmium telluride (CdTe) and crystalline silicon (c-Si). Chinese industrial policies focusing on solar PV as a strategic sector and on growing domestic demand have enabled economies of scale and supported continuous innovation throughout the. The classification of photovoltaic modules is the basis for export declaration, primarily based on the International Harmonized System of Product Classification and Coding (HS Code). This policy forces industry consolidation while raising international module costs 10-15% through 2026. In December 2024, the US Department of Commerce. On 9 January 2026, China's Ministry of Finance announced a significant adjustment to its export tax rebate policy.

Photovoltaic panel export policy

China Ends PV Export Rebates: What's Behind the Policy Shift?

China will abolish VAT export rebates for photovoltaic and related products from 2026, reshaping global trade dynamics. What forces are driving this strategic policy change, and how will it ...

[A tightened U.S. solar trade environment - pv magazine USA](#)

Trump signed an executive order in February 2025 adding a 25% tariff to steel and aluminum, key materials in solar manufacturing: Aluminum is used in frames and roof racking, and ...

Solar and storage 2025: US policy risks and the new global market

Although AD/CVD duties continue to fluctuate, PV module exports from the four Southeast Asian countries--Vietnam, Malaysia, Thailand, and Cambodia--to the U.S. have declined sharply. ...

China Cancels PV Module Export Tax Rebates April 2026 , Analysis

Beijing's decision to eliminate solar export VAT rebates tackles deep structural problems: massive oversupply, unsustainable pricing, and growing trade tensions. This policy forces industry ...

Overview of Trade and Policy Measures for U.S. Solar Manufacturing

In June 2024, the U.S. International Trade Commission found that imports of c-Si cells and modules from Vietnam, Malaysia, Thailand, and Cambodia may be harming the U.S. solar panel ...

[Executive summary - Solar PV Global Supply Chains](#)

These challenges have resulted in delays in solar panel deliveries across the globe. Globally, policies to support solar PV to date have focused mostly on increasing demand and lowering costs.

Spring 2025 Solar Industry Update

- Provincial policies have subsidized residential PV installations. o The vast majority of Pakistan's PV installations are in the residential and commercial/industrial sectors, including on- and ...

Photovoltaic Components Export

Guide: HS Codes, Declaration ...

Detailed explanation of the core rules for the export of photovoltaic modules, including HS classification (assembled modules under 8541430000), declaration elements, international FTA ...

Navigating Photovoltaic Export Codes: A 2025 Trade Compliance Guide

Exporting solar panels in 2025 requires navigating a regulatory obstacle course: Brazil's recent 12% import tariff hike serves as warning - developing nations are increasingly using trade barriers as ...

Policy-driven transformation of global solar PV supply chains and

Policymakers have two primary strategies for increasing self-sufficiency in the PV supply chain, namely, limiting the availability of foreign products and introducing supportive measures for
