Overview

For illustration and purposes, the following figures provide a sample of the input modules and results obtained from an spMats model created for the ground mounted PV solar panel reinforced concrete footing in this example. s needed to complete system construction. This manual must be used in conjunction with project specific drawings which are provided for each in allation by Solar Foundations USA®, Inc. Space requirements and layout for photovoltaic and solar water heating system components should be taken into account early in the design. DWG format available upon request. It can also generate electricity on cloudy and rainy days from reflected sunlight.
