

Photovoltaic panel open circuit current price list

Overview

Help consumers understand the cost of various solar panel systems with its detailed price guide, covering different options from entry-level polycrystalline panels to high-end monocrystalline panels. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. According to the solar price list provided by the PowerHome website, solar panels on the market vary in price depending on the brand, model, and installation service chosen. Discover how factors like efficiency ratings and market trends shape costs, with real-world data to guide your solar. How much do solar panels cost on average?

As of 2026, the average cost of residential solar panels in the U. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2. 50 per watt of installed capacity (more on price per watt below).
