

Plane fixing method of photovoltaic bracket

Overview

The fixed mounting method directly places the solar photovoltaic modules toward the low latitude area, at a certain angle to the ground, to form a solar photovoltaic array in series and parallel, so as to achieve the purpose of solar photovoltaic power generation. To ensure the smooth installation of photovoltaic system brackets and meet design requirements, Guidance Method For The Installation Of PV System Brackets are provided, including ground-mounted, rooftop, adjustable tilt angle, floating, Building-Integrated Photovoltaics (BIPV), bifacial, and. The installation selection of photovoltaic ground brackets is mainly based on factors such as the fixing method of the bracket, terrain requirements, material selection, and the weather resistance, strength, and stiffness of the bracket. Gather necessary tools and materials, including brackets, screws, and a wrench; 2.
